UNITED STATES PATENT OFFICE.

JAMES C. AIKIN, OF NEW YORK, N. Y.

DESIGN FOR BARREL OF A PENCIL-CASE.

SPECIFICATION forming part of Design No. 11,806, dated June 8, 1880.

Application filed December 26, 1879. Term of patent 7 years.

To all whom it may concern:

Be it known that I, JAMES C. AIKIN, of the city, county, and State of New York, have invented a new and original Design for the Barrel of a Pencil-Case, Pen-Holder, Tooth-Pick, or Watch-Key, of which the following is a specification, reference being had to the accompanying drawings.

Figures 1, 2, and 3 are three different side views of a barrel of my design. Fig. 4 is a transverse sectional profile view of the same.

The form of the barrel is hexagonal. Three of its sides, A B C, are shown ornamented, and the intervening sides, D E F, plain. The ornamentation of the sides may be produced by painting or enameling, or by inlaying with gold or other metal, glass, shell, stone, or gems. By making the sides D E F, between the ornamented sides, plain and of a dark color the ornamentation is made to present a bold and strikingly brilliant appearance.

The ornamentation on the side A consists of a vine with leaves, flowers, and a bird, as indicated by *a a* in Fig. 1.

The ornamentation on the side B consists of a vine with leaves and flowers, as indicated by *b b* in Fig. 2.

The ornamentation on the side C consists of a vine with leaves and flowers, as indicated by *c c* in Fig. 3.

I am aware that a design for pencil-cases is not new which consists of an octagonal-shaped barrel having plain pearl strips set in some of its sides, the alternating sides being ornamented, as in Reissue Patent No. 5,036; and such I disclaim.

I claim—

1. The design for a pencil, pen, or tooth-pick case, the same consisting of the hexagonal-shaped barrel having the sides A B C, provided with central vines and projecting leaves and flowers *b b*, alternating with the plain smooth sides D E F, as herein described and shown.

2. The design for the barrel of a pencil-case, pen-holder, tooth-pick, or watch-key herein shown and described, consisting, essentially, of the ornamentation *a a*, composed of vines, with leaves, flowers, and bird.

JAMES C. AIKIN.
